

Silcadur AL-S is a highly sophisticated anti-welding paste for the high pressure die cast process of aluminium alloys.

Properties

- Excellent release and metal flow
- Bright casting surfaces
- Outstanding cosmetics with no carbon build-up
- Fast wetting
- All-round product for 3 alloys
- High temperature resistance
- Extremely user friendly

Typical Area of Application

- Anti-welding paste for aluminium, magnesium and zinc alloys in the high pressure die cast process

Recommendations for Processing

- Silcadur AL-S shall be applied sparingly via brush onto the affected parts of the casting mould

Technical Data

- Colour: Silver Grey
- Carrier: Mineral Oil
- Density: 0.95g/cm³
- Ph-Value: N/A
- Viscosity at 25°C: N/A
- Appearance: Soft Pasty
- Odour: Typically

Storage and Safety

- Store in original packaging and appropriate dry conditions, and protect from frost.
- Additional information is available on the Material Safety Data Sheet.

These products are subject to continuous strict production controls and comply with our own factory specifications. A warranty for each case cannot be give, due to the variety of relevant factors. Therefore, we recommend the implementation of field tests. Herewith, any liability is expressly excluded.
